BENEFITS OF REAL THIN STONE

1. Uncompromising beauty
2. Unmatched by imitation
3. Does not fade
4. Safe to pressure wash
5. All natural, eco-friendly
6. Ideal for Interior and Exterior
7. No efflorescence
8. LEED and Built Green points
9. Adds value to your property
10. No Volatile Organic Compounds (VOC's)

GENUINE STONE

WHAT IS THIN STONE?

K2's thin stone is real stone, cut to approximately 1" thick, making it light enough to be installed as an adhered veneer. It offers ease of application without losing the uncompromising beauty and durability of natural stone. It does not require special mechanical fastening or foundations. Due to its size and weight, both transportation and installation costs are less than full thickness masonry. All of K2 Stone's thin veneers are offered with matching corners.
